ENGINEERED SOLUTIONS

CAD for Small Businesses

Delivering 2D and 3D infrastructure design projects has its challenges, even for small businesses. Projects are expected to be delivered on time and on budget, even as complexities and scale increase. Not to mention, many project teams are now in work-from-home environments, which can make collaboration difficult. Is your software helping you overcome these challenges?

MicroStation, the CAD leader for infrastructure design projects, can help. Engineers, architects and construction professionals from around the globe rely

on MicroStation to openly collaborate and deliver fast, accurate, and reliable infrastructure designs and construction-ready deliverables for projects of any scale. By using MicroStation to save time and reduce costs, these professionals are winning more projects.

Work with Datasets of Any Size

You need CAD software that can handle the massive amount of data demanded by infrastructure projects. MicroStation can help you generate efficient 2D and 3D drawings for datasets of any size.

Produce Consistent, High-Quality Deliverables

MicroStation can integrate any data type to generate accurate and dependable drawings, schematics, and models for construction and operations.

Utilize Truly Timeless DGNs

Infrastructure project lifecycles are long. You can rely on MicroStation to natively utilize the data needed to deliver your projects, no matter when it was created. Yes, that includes the data you created in the 1990s.

Mitigate Risk with Built-for-Purpose CAD

Engineers depend on MicroStation to enforce project standards and to find issues faster when collaborating around the clock on demanding infrastructure projects.

Choose a Flexible Licensing Option

Understanding that small businesses need these top-notch solutions, but do not need enterprise-level resources, Bentley developed Virtuosity. As a Bentley company, Virtuosity provides all the benefits of the larger organization, but is geared specifically toward helping small firms do their jobs faster and easier to ultimately deliver better projects.

Now you can take advantage of the Virtuoso subscription, a 12-month Bentley software practitioner license that includes the “keys” to unlock customizable training, mentoring and consulting services. **II**

Get a Free Trial of MicroStation, the CAD Leader for Infrastructure Design Projects

Experience the power of MicroStation for yourself with our 14-day trial offer. During this period, you will be able to access in-app learning, watch step-by-step video tutorials and receive personal outreach from experts who are ready to answer your questions.

“The best part of the software is its settings. There is one click for scale, annotations, reference attachments and level managements. Its interoperability with other software for importing and exporting is made easy. It automatically saves your work, unlike other CAD software.”

– Civil Engineer, G2.com Review
