

Top 7 Reasons To Move to iTwin® Capture Cloud Services

As reality capture experts, we know that your job may not be limited to just capturing reality data. With iTwin Capture Cloud Services, go over and beyond the creation of the digital replica of real-world conditions by capturing, managing, analyzing, and sharing reality data to accelerate your workflows.

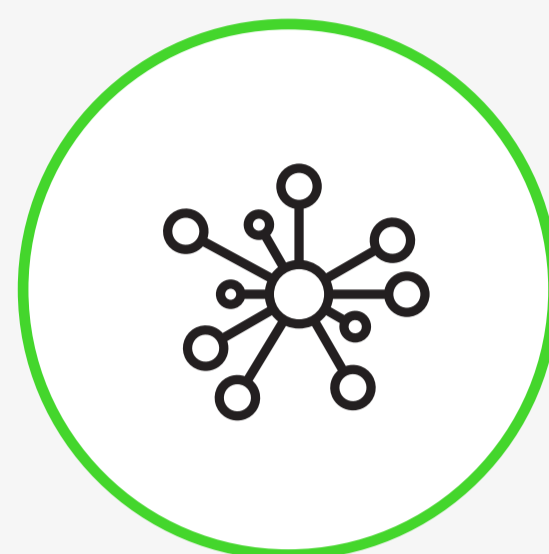

1

No Hardware Purchase or Maintenance Costs

Manage and reconstruct reality mesh and/or point clouds without investing or maintaining on-premises infrastructure.

2

Reality Data Sharing and Accessibility

Easily share and access reality data within an organization or across multiple organizations using a connected data environment.

3

Interoperability

Smoothly import your reality data in any iTwin products or any third-party software.

4

Pay for What You Consume

Pay per gigapixel or point cloud.

5

Extract Insights

Extract features from your reality data and leverage advanced analysis.

6

Artificial Intelligence

Improve your workflows and save time by leveraging artificial intelligence for asset inventories, inspection, or ground occupation.

7

Unmatched Processing Speed

Speed up your production using parallel computing and meet your most demanding deadlines by simultaneously processing multiple jobs.

Advance Your Infrastructure Workflows

With This All-in-one Reality Capture Solution to Capture, Manage, Analyze, and Share Your Reality Data.
